

IV. Writing

Task A: A Letter to my future self

Hello, my future self! I'm very interested in your new interests, hobbies and aspirations. I wonder how I have changed for this time.

Now I study in the 10th grade and my marks are great. I want to study for a psychologist and to help people in their lives. And also I like to draw. Are you still drawing? ~~I don't want~~ I would want to see your drawings and to see how you improved! And I'm also interested, how often do you draw? Because I'm drawing often only when I have very much of free time, and that period usually is summer. In the summer time I walk with my cats, and seeing the beautiful places I'm getting inspired, so I draw it. Also I love drawing cats.

And speaking for a cats, do you have one? Or maybe even two or more? I love my cats. They are very clingy sometimes, but I like it.

~~when five years~~ In the next five years I'm planning to visit other countries, such as Russia or maybe even USA. I'm sure that English would play an important role in this experience. Often I'm learning English by watching vlogs, or other entertaining videos in English. Also I want to start watching films and series in English, I think it would improve my English pretty much.

On this note, I think I should finish my letter. Bye, and I'm wishing you the best!

III. Use of English

1) collecting

11) visited

2) happened

12) was looking forward

3) offering

13) suggested

4)

14) have seen

5)

15) had never experienced

6)
